PROFESSIONAL SUMMARY

Software engineer with 3+ years designing and shipping production-grade systems across the full stack — from cloud infrastructure and agentic AI pipelines to responsive frontends. I work across the entire delivery lifecycle: architecting scalable AWS environments, building LLM-powered backends, and shipping clean, data-driven UIs. Whether the problem is automating complex workflows with AI agents, designing event-driven microservices, or optimizing data pipelines at scale — I can own it end to end.

SKILLS

- **Programming languages** : Python, JavaScript, TypeScript, Java, HTML5, CSS3, Go, C#, Bash, Apex(Salesforce)
- **Cloud & IaC** : AWS(ECS, EKS, EC2, Lambda), Docker, Kubernetes(K8), Google Cloud Platform, Terraform, Azure
- **Databases** : Qdrant, PostgreSQL, DynamoDB, RedShift, MongoDB, MySQL, MS SQL Server
- **AI/LLM** : Langchain, LangGraph, LangSmith, MCP, AWS Bedrock, Azure OpenAI, RAG, TensorFlow(RNN, CNN, GAN), Agentic Development, AWS Bedrock AgentCore, A2A
- **Frameworks** : Next.js, Springboot, FastAPI, ASP.NET, Django, Angular
- **Other Tools** : MSK Kafka, Helm, Snowflake, Jira, Git, Postman, RESTful,NewRelic
- **Skills** : Agentic Development, Cloud Orchestration, CI/CD, Systems Design & Architect, Problem Solving & Critical Thinking

PROFESSIONAL EXPERIENCE

University of Phoenix | Software Engineer 2 May 2024 - Present

- **Spearheaded and sole-delivered Student Academic Dashboard** (Next.js, Recharts, Valkey, Aurora DB) consolidating 6+ data sources — grade trends, risk charts, credit completion, AI-generated behavioral profiles, and Salesforce notes summaries — into one platform, cutting advisor research time by **80%**.
- **Designed and owned end-to-end Knowledge Base RAG Chatbot** under hard deadline — architected multi-account, high-availability, cost-optimized system on AWS: Kafka, Lambda, Qdrant vector, OpenSearch, LangGraph hybrid-search agentic workflow, Next.js streaming UI, achieving **97% retrieval accuracy** and reducing advisor search time by **50%**.
- **Provisioned entire cloud infrastructure from scratch** for both platforms: VPC, security groups, ECR image pipelines, ECS Fargate clusters, ALB, Aurora connections, cross-account IAM roles and policies, Azure Entra SSO — all Terraform-managed with zero-downtime **Blue/Green CI/CD** from dev to production.
- **Built Agentic Orchestration Engine** using LangGraph and AWS Bedrock to synthesize multi-source student data into prioritized next-best-actions for advisors — eliminating manual record lookup and enabling instant, data-driven student outreach.
- **Engineered Salesforce Notes Summarizer** processing **1M+ monthly case and journey comments** with AWS Bedrock, LangChain, and PII Guardrails, achieving **99% accuracy** and surfacing complete student journey context in seconds.
- **Migrated 20+ event streams to Amazon MSK** and implemented Step Functions orchestration across Lambda-based microservices, hardening pipeline reliability and scalability across multiple business units.
- **Mentored a junior intern** on AWS architecture, agentic development patterns, and production deployment practices; led technical direction on all team AI/cloud initiatives.
- **Won 3 company hackathons** building agentic AI solutions — both major platforms evolved directly from hackathon prototypes. Pioneered VS Code agentic workflows (Copilot, OpenCode, MCP) enabling Terraform infra provisioning in **20–30 min**, months before industry adoption.
- Recognized with **2 Star Performer awards** for technical leadership, on-time delivery of high-complexity projects, and measurable business impact across AI and cloud initiatives.

Arizona State University | Project Coordinator (Tempe, Az) Feb 2023 – Apr 2024

- Directed 30+ research and outreach events across 50+ stakeholder organizations, improving cross-functional team performance by **10%**.
- Maintained and debugged center website (MySQL, .NET Core, ReactJS, SurveyJS), improving site functionality and UX by **15%**.

Sairaj Telecom | Software Development Engineer Intern (Pune, India) Apr 2021 –Jun 2022

- Conceptualized a comprehensive dashboard to manage and oversee the entire spectrum of services provided by the company, enhancing efficiency by 20% in accounting, service delivery, and data management.
- Simplified company accounting processes by 20%, thereby contributing to the streamlining of financial operations.
- Revitalized frontend and backend development using **MERN (MySQL, Express.js, React.js, Node.js)** Stack, achieving a 15% growth in user retention within the first quarter.
- Ensured reliable and scalable performance by deploying the application on **AWS (S3, EC2, CloudWatch's, RDS)**.

Safear Defense | Systems Engineer (Bangalore, India) Jun 2020 – Mar 2021

- Analyzed and maintained 1 million+ data records; enhanced data accuracy by 25% and decreased maintenance overhead by 15%.
- Leveraged data analysis for informed decision-making and precision-defined flight paths to optimize operational efficiency by 20%.
- Led successful collaborations with cross-functional team of 10, driving significant organizational improvements.

EDUCATION

MASTER OF SCIENCE: INFORMATION TECHNOLOGY (Information Systems Management) May 2024

Arizona State University – IRA A. Fulton Schools of Engineering GPA- 4.0/4.0

BACHELOR OF ENGINEERING: AEROSPACE ENGINEERING Jul 2022

JAIN UNIVERSITY – IIAEM GPA- 8.49/10

CERTIFICATION

[AWS Certified Solution Architect- Associate](#) | [AWS Certified Cloud Practitioner](#) | [AWS Certified AI Practitioner](#) | [AWS Certified Developer – Associate](#)
